

LEVEL 3 Re-CERTIFICATION

DESCRIPTION:	15K BX 169 5.125" Lee Posi Lock Assembly
SERIAL NUMBER:	1811-1325
DESCRIPTION:	2-1/16" 15K BX 152 Blind Flange
SERIAL NUMBER:	1810-223
DESCRIPTION:	3-1/16" 15K BX 154 Blind Flange
SERIAL NUMBER:	1812-505
ORIGINAL EQUIPMENT MANUFACTURER:	NXL Technologies
PRESSURE TEST DATE:	November 26, 2025
SALES ORDER NUMBER:	62741
RECERT LOCATION:	Lacombe County, Alberta, Canada

ACTIVITIES PERFORMED

- | | | |
|---|---|------------------------------------|
| ☒ Visual Inspection | ☐ Replace all Seals | ☐ Pull Test |
| ☒ Disassemble | ☒ Pressure Test | ☐ Other |
| ☒ Reassemble | ☐ Function Test | |

RESULTS

VISUAL INSPECTION

Passed

- Assembly was disassembled and inspected for nicks, burrs, gouges, porosity, and other indications that may affect the performance of the part.
- Minor corrosion noted on wetted parts.

PRESSURE TEST

Passed

- Assembly was pressure tested to NXL Technologies Specification of 200 psi and 15,000 psi.
- All tests passed.

ADDITIONAL NOTES

- Equipment passed all tests and is ready for service.

NXL Technologies Inc. adheres to established industry standards, including NACE MR0175, ASME, ASTM, ANSI, applicable API product specifications, and pertinent regulatory and Industry Recommended Practices. With a strong commitment to client-focused service and a dedication to excellence, we deliver innovative solutions and unmatched expertise in pressure control equipment and engineering standards. Guided by our values of stewardship and teamwork, we ensure exceptional support and the highest quality in every interaction.

This Certificate of Conformance is issued based on the inspection, testing, and re-certification procedures carried out on the listed equipment, performed in accordance with applicable industry standards and specifications at the time of inspection. The attached Traceability Logs, Test Reports and Heat Certifications and documentation of any repairs (as applicable to the product) are provided for your records.

All equipment provided is subject to the terms and conditions of the purchase agreement. The owner/operator is responsible for ensuring proper use, maintenance, and inspections, as well as adherence to recertification schedules, the use of OEM replacement parts, operating within the original design specifications, and compliance with NXL Technologies' OEM guidelines and all applicable local, regional, and international regulations. Unauthorized modifications or alterations made without explicit approval from NXL Technologies, improper use, or failure to meet required maintenance, inspections, recertification standards, or design specifications will invalidate this Certificate of Conformance and release NXL Technologies from any liability for resulting damages, malfunctions, or noncompliance. NXL Technologies assumes no responsibility for incidents arising from negligence, misuse, or failure to operate equipment within its original design specifications and recommended guidelines.

CERTIFICATE OF CONFORMANCE

In accordance with regional regulations and practices, NXL upholds annual recertifications for all lifting and rigging equipment. For pressure control equipment (PCE), NXL follows a three-year recertification schedule in Canada and the Kingdom of Saudi Arabia (KSA). In other global regions, NXL aligns with industry standards, applying a five-year recertification period for PCE as standard practice.

Regards,
